FY2026 Control Walkthroughs · Draft Findings for the CPA

Control findings for the CPA from walkthroughs and limited testing; no opinion on internal control.

Client	HANGS Construction Services LLC
Period	Fiscal year July 1, 2025 to June 30, 2026
Engagement	SOX-style walkthroughs of eleven key controls for Cinderbrook Bank and the board: purchasing to pay, billing to cash, payroll, the close and system access. Design and implementation, then a few operating instances.
Prepared from	11 files: the approval matrix and process narratives, the user access report, the purchasing, billing and payroll records, the journal entry listing, the bank reconciliations, the trial balance and the walkthrough notes
Prepared by	The F1 Finance Audit Machine, a demonstration. Fixed procedures on invented data; no AI model was used.
Status	Draft. Not reviewed, concluded or signed. Nothing was sent to the client, the bank or the board.

The Yardsticks

Journal entry review threshold, the approval matrix	$25,000.00
Materiality, the year-end audit	$350,000.00

What the Walkthroughs Found

Process	What was found	Amount
Purchasing	The Accounts Payable Specialist set up three vendors without approval and approved her own payments to them (SOD-01, significant deficiency)	$64,675.50
Purchasing	Five sampled payments were approved by the Controller with the invoice signed off	$293,694.30
Billing	Five pay applications approved before they were sent; retainage recomputes; receipts posted on time	$9,308,340.00
Payroll	Payrolls reviewed before release; the Payroll and HR Manager entered her own raise before it was approved (PAY-01, deficiency)	$4,999.93
The close	Thirty manual entries over the threshold were posted by the Controller with no second review (JE-01, significant deficiency)	$8,045,083.44
The close	Twelve reconciliations on time and in balance, none signed as reviewed (REC-01, deficiency); June agrees to the books	$5,361,685.31

Signature: none. These findings give no opinion on internal control. The CPA reviews the workpapers, decides every severity and every open item, and decides what is reported to Cinderbrook Bank and the board.

DRAFT FOR THE CPA

Draft Control Findings

Deficiencies, Proposed Severity and Recommendations

SOD-01 · $64,675.50: Significant deficiency, proposed (P2P-1, P2P-2, ITG-1). Mei Northcott, Accounts Payable Specialist, can set up vendors and approve payments. She set up Marten Lake Aggregates LLC, Rainier Site Supply LLC, Sound Formwork Rentals LLC without approval and approved 4 payments to them herself, $64,675.50, each under her portal limit. The invoices are for job materials and nothing suggests the vendors are not real, but the controls that would stop a fictitious vendor were bypassed. Recommendation: remove her approval permission in the bank portal; have the Controller approve every vendor setup and bank change before payment; review the vendor change report monthly; confirm the three vendors' bank details by calling a number on file; review system access every year.

JE-01 · $8,045,083.44: Significant deficiency, proposed (CLS-1). 30 manual entries over $25,000, $8,045,083.44, were prepared and posted by the Controller with no second review, including accruals, depreciation and the over and under billings. The quarterly review later found September interest was never accrued (INT-01), the kind of error a second review catches. Recommendation: the Chief Financial Officer reviews and initials the Controller's entries over the threshold before posting, turn on the system's approval step, and sign a monthly close checklist. The CPA considers whether this and SOD-01 together are a material weakness.

PAY-01 · $4,999.93: Deficiency, proposed (PAY-1, PAY-2). Renata Salazar, Payroll and HR Manager, can edit the payroll master and process payroll; she entered her own raise, $88,000.00 to $98,000.00, before the form was signed, and $4,999.93 more was paid to June 30 (the payroll audit's RATE-01). The Controller's review sees totals only, and the master file change report is never run. Recommendation: run the change report every payroll and have the Controller review and sign it; the President and CEO signs PAF-25-119 or the pay is corrected.

REC-01: Deficiency, proposed (CLS-2). All 12 operating account reconciliations were prepared on time and reconcile, and June ties to the trial balance, but none is signed as reviewed. The cash audit found the same in the company's June reconciliation. Recommendation: the Controller signs and dates each reconciliation within the 15 days and follows up any item older than 60 days.

What was done

The machine listed the eleven key controls in the client's narratives, walked one transaction through each process to test design and implementation, and tested operating instances: every vendor change, payment, rate change, leaver, manual entry over the threshold and reconciliation, and seeded samples of payments, pay applications, receipts and payrolls. It compared the user access report with the conflicts the policy forbids.

What the CPA decides

Every severity, whether SOD-01 and JE-01 together are a material weakness, management's responses (RESP-01) and what goes to Cinderbrook Bank and the board. The machine gives no opinion on internal control.

WHAT STILL NEEDS A PERSON

SOD-01 · $64,675.50: Significant deficiency, proposed (P2P-1, P2P-2, ITG-1). Mei Northcott, Accounts Payable Specialist, can set up vendors and approve payments. She set up Marten Lake Aggregates LLC, Rainier Site Supply LLC, Sound Formwork Rentals LLC without approval and approved 4 payments to them herself, $64,675.50, each under her portal limit. The invoices are for job materials and nothing suggests the vendors are not real, but the controls that would stop a fictitious vendor were bypassed. Recommendation: remove her approval permission in the bank portal; have the Controller approve every vendor setup and bank change before payment; review the vendor change report monthly; confirm the three vendors' bank details by calling a number on file; review system access every year.

JE-01 · $8,045,083.44: Significant deficiency, proposed (CLS-1). 30 manual entries over $25,000, $8,045,083.44, were prepared and posted by the Controller with no second review, including accruals, depreciation and the over and under billings. The quarterly review later found September interest was never accrued (INT-01), the kind of error a second review catches. Recommendation: the Chief Financial Officer reviews and initials the Controller's entries over the threshold before posting, turn on the system's approval step, and sign a monthly close checklist. The CPA considers whether this and SOD-01 together are a material weakness.

PAY-01 · $4,999.93: Deficiency, proposed (PAY-1, PAY-2). Renata Salazar, Payroll and HR Manager, can edit the payroll master and process payroll; she entered her own raise, $88,000.00 to $98,000.00, before the form was signed, and $4,999.93 more was paid to June 30 (the payroll audit's RATE-01). The Controller's review sees totals only, and the master file change report is never run. Recommendation: run the change report every payroll and have the Controller review and sign it; the President and CEO signs PAF-25-119 or the pay is corrected.

REC-01: Deficiency, proposed (CLS-2). All 12 operating account reconciliations were prepared on time and reconcile, and June ties to the trial balance, but none is signed as reviewed. The cash audit found the same in the company's June reconciliation. Recommendation: the Controller signs and dates each reconciliation within the 15 days and follows up any item older than 60 days.

SCOPE-01: Walkthroughs of eleven key controls with small samples, for the lender and the board. Not an examination of internal control and no opinion on it; controls not listed in the narratives were not tested.

RESP-01: Management's responses to SOD-01, JE-01, PAY-01 and REC-01, with owners and dates, have not been obtained. The CPA requests them before anything goes to Cinderbrook Bank or the board.

SIGN-01: These are draft workpapers and findings for the engagement partner. They give no opinion on internal control. Nothing has been signed, posted or sent to the client, the bank or the board.

These findings are a draft for the engagement partner. They give no opinion on internal control; nothing has been signed or sent.
